BATHCH MANAGEMENT

SAP Batch Management (LO-BM) is a solution designed to help companies across industries facilitate precise identification of a production lot for materials managed in batches, including computer software, electrical goods, chemical and pharmaceutical manufacturing process management, and more.

BATCH

The differentiation of a product based on various specifications or characteristics. A batch does not have any master data attributes. The system stores all information as characteristics (for example, country of origin or expiration date).

CONFIGURATION

1. BATCH LEVEL
